- Simple and ready to use even by ordinary layman
- Easy & rapid mobility through congested areas like heart of city or small streets
- Accelerates working speed and saves time
- Effective time bound solution for for all construction jobs;
 - Available in 10, 15 & 25 kg packs
- Eliminates sieving of sand on site
- Maintains cleanliness & lesser dust on site

Technical information:

RMM is prepared in controlled conditions in such a way that it maintains consistency in the material proportion as well as in properties.

Pack size:

Handipack (10 kg & 15 kg)
Maxipack (25 kg)

Description:

Dry pre-blended cementitious material conforming to Indian standard specifications, containing PPC and building sand

Mix proportion ratio:

As per client's requirement for masonry, plaster, flooring and other uses.

Uses:

Brick block laying, Pointing, Patching, Rendering and general sand placing and cement repair works.

Compressive strength:

RMM for masonry: Typically 6-8 N/mm² at 28 days

Density:

Typically 2000 kg/m³

Shelf life:

6 months in unopened bag stored under dry conditions

On Site Storage Condition:

This product must be stored in unopened bags clear of the ground in cool dry conditions and protected from excessive heat.

Health & Safety Precautions:

- Risk of serious damage hence avoid direct contact with eyes and skin
- Avoid breathing dust
- On contact with eyes or skin, rinse immediately with plenty of clean water and seek medical advice if any eye contact.
- **KEEP OUT OF REACH OF CHILDREN**

How to use: (See photographs)

1. Mix contents of the bag before use then pour onto a clean flat surface.
2. Add clean water slowly (water quantity shall be as per Indian standard specifications). Do not over water as this will weaken the mix.
3. Mix continuously to make the mix workable.
4. For best results use within 30 minutes of mixing.
